## INGREDIENTS

- 400-500 g yellow peaches

## INSTRUCTIONS

1. Wash, core and roughly chop the yellow peaches.
2. Place in a blender and reduce to a purée.
3. Strain through a fine sieve to remove any bits of skin and pour the mixture into a shallow dish.
4. Put the dish in the freezer and leave to set for 4 hours, stirring from time to time with a whisk or fork so that the mixed fruit hardens and forms small crystals.
